Art Unit: 1711

1. A response has been filed on November 17, 2004.
2. Claims 1-9 are being examined.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 & 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Donofrio.

UKK Donofrio ^{describes} protein-enriched thermoplastics (abstract). Suitable polymers are set forth in col. 2, line 62 to col. 3, lines 38. Polypropylene is one of them. Keratin is admixed with the thermoplastic polymer (col. 4, line 61). A molded article is formed from the composition (col. 61, lines 50-63).

Above claims therefore lack novelty.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1711

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1 and 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Donofrio et al (US 5808012) in view of Donofrio et al (US 5723588) and Fleischner (US 4818520).

Disclosure of Donofrio '012 is set forth in item 4 above.

Donofrio '012 does not mention (a) amount of keratin (of instant claim 4) and, (b) species of avian feathers (of instant claims 5-8).

Donofrio '588 also describes protein enriched thermoplastics. In col. 4, lines 7-13, patentee suggests an amount of polypeptide to be useful in the composition as 10,000 ppm which turns out to be 1%. This amount falls within the range claimed in instant claim 4.

Fleischner disclose keratin protein hydrolysate products. In col. 1, lines 17-20, the patentee describes avian feather as a species of keratin.

Therefore it would have been obvious to use, in the composition of Donofrio '012 (a) amount of keratin taught by Donofrio '588 and (b) avian feathers as a specific keratin in order to prepare a composition with better mechanical properties, and at low cost.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1711

8. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is vague in reciting "percent by weight or volume". The precise scope of this claim cannot be understood because the amount of keratin by weight may not necessarily be the same as the one by volume.
